Visitor Management System (VMS)

High Quality at the Lowest Cost with Amazing Features

VISITOR MANAGEMENT SYSTEM

Easy to setup and use Visitor Management System. Fast registration of visitors with MyKad Reader and low cost passport scanning solution. With searchable database and reports.

Visitor Management System with MyKad Reader & Webcam

The Visitor Management System is designed to enhance security for your premise by tracking visitors. Tracking of visitor is done by registration using a computer system by MyKad Reader, Scanner or manual entry using computer form. Information about the visitor and photo are stored in the system along with the in and out log reports. Other information about the visit can also be recorded such as the person to meet, location and problems with the visitor. Visitors can be blacklisted with alert warning through this system.

Generate Barcode passes for individuals or cars. Use passes to check out visitors with barcode readers. Issue permanent passes for frequent visitors.

Visitors Management System as been designed to be user friendly. A login system is built in to manage User Admin and Standard User levels. The login information can be used to track which guard personal visitors.
